التنفيذي  
ALTANFEETHI

Congrats to Ibrahim Sejini for successfully completing his training at Altanfethi in King Abdulaziz International Airport!

## Congratulations to Our Champions!

In the Opening Match Cup of the Dean's League 2025, the Engineering Football Team secured their first-ever victory against the AI Team, winning 2-1 in an exciting and hard-fought match! Both goals were scored by Aban Olfat, leading the team to a well-deserved win that showcased teamwork, determination, and true engineering spirit. We're incredibly proud of our players for their outstanding performance and sportsmanship — this victory reflects the passion and energy that drive our students both on and off the field.

## Engineering The Future Together!

In collaboration with the **Saudi Council of Engineers**, the JIC Engineering Club hosted its first event of the academic year, held in celebration of World Engineering Day.

The event focused on introducing students to the Engineering Profession Practice System and the importance of professional examinations in shaping a successful engineering career. Students from both Industrial and Architectural Engineering attended, engaging actively and asking insightful questions throughout the session.

Members of the Engineering Club were also present to welcome students, share guidance, and highlight the club's upcoming plans and initiatives. This event reflected a shared commitment to Engineering the Future Together — building knowledge, fostering collaboration, nurturing pride, and maintaining integrity within the engineering profession.
